Online Library Exam 2 Reproduction And Development

Human Reproduction, Growth and Development

This takes about 3 days, during which time the zygote will divide several times to form a ball of cells known as an embryo. In the uterus, the embryo embeds itself in the thick lining (implantation) and continues to grow and develop. The gestation period for humans is 9 months. Major development of organs takes place within the first 12 weeks, during which time the embryo gets nutrients from the mother by diffusion through the uterus lining.
