Hair Loss and the Big Pharma - The Ultimate Guide on ...

The most common cause of hair loss is a hereditary condition that happens with aging. This condition is called androgenic alopecia, male-pattern baldness and female-pattern baldness. It usually occurs gradually and in predictable patterns – a receding hairline and bald spots in men and thinning hair along the crown of the scalp in women.

Hair loss - Symptoms and causes - Mayo Clinic

Androgenetic alopecia is female-pattern baldness or hair loss caused by genetics, or family history. It's the leading cause of hair loss in women and generally begins between the ages of 12 to 40...

Hair Loss in Women: Causes, Symptoms, Treatments

One of the major reasons in this is the diet plan or the lack of proper nutritional value in daily food. So, the loss of hair with a person continues unless there is a restricted weight loss and unless the person starts taking nutritionally balanced diet with increased calorie, and various essential nutrients.
