Shotcrete: More Engineering Developments. London: CRC Press. <https://doi.org/10.1201/9780203023389>. COPY. Marking a crucial point in the sharing of research, this cutting-edge text spearheads advances in cross-industry expertise. Presenting papers addressing topics ranging from repair, accreditation of nozzle men, and early-age performance, to the blast resistance of shotcrete linings, the work draws on contributions from individuals across the shotcret.

Around the world, several mines have trialled hydro-scaling as an alternative to conventional scaling in headings to be shotcreted. In Australia, Gold Fields Ltd recently conducted a trial using a shotcrete machine to carry out hydro-scaling in their Waroonga gold mine at Agnew Gold Mining Company. This paper summarizes an investigation into the effectiveness of hydro-scaling conducted at LKAB ' s Kiirunavaara iron ore mine in Sweden as well as the Waroonga trial.

For many mining operations, implementation of shotcrete is a strategic decision predicated on enhanced productivity and safer working environments, while additionally providing an improved ability to overcome difficult ground conditions. However, the poor tactical aspects of implementation, including management, engineering and production operations, have undermined the success of shotcrete for many operators.
